

SINERGY

COMPLETE EXTRUDED FEED FOR GROWING UP AND FATTENING TROUT

High energy pellets, either sinking or floating ("G"), containing **LAPs (Land Animal Products)**, but devoid of vegetable proteins. Particularly indicated to support sustained growth with little impact on the environment, when rationed wisely, these pellets ensure a versatile use even in less than optimum oxygenation, thanks to the high digestibility of the raw materials used. The floating type of "size 8" sinking feed is sold as "9 G".
