

AQUA

COMPLETE EXTRUDED FEED FOR PRE-FATTENING AND FATTENING SEA BASS AND SEA BREAM

Extruded feed for pre-fattening and fattening phase of sea-water species, with the inclusion of premium raw material. The high biological value of proteins, almost exclusively of marine origin, and the extremely high content in EPA and DHA make this feed range unique for the production of seafood rich in Omega-3. "HE" labelled feeds are specific for sea-bass breeding, while the other feeds can be used for both species.
