

PROACTIVE

MICRO PELLETS AND EXTRUDED PELLETS FOR THE POST-WEANING AND PRE-FATTENING OF STURGEON

Micro pellets and extruded pellets for the post-weaning and pre-fattening of farmed sturgeon. Raw materials with high digestibility ensure high palatability and harmonic **growth, with** high performances. Particular attention was given to the inclusion of functional products that ensure intestinal and liver health, both particularly important in this breeding phase.
